

# Precision Machinist – Milling / Turning

**Location:** Estover, Plymouth

**Pay:** From £30,000 per annum (depending on experience)

In addition to competitive pay, overtime is available.

## About Oakmount Control Systems

Oakmount Control Systems Limited is a fast-growing engineering company based in the Southwest, with offices in Plymouth, Devon and Yeovil, Somerset. Our multidisciplinary team of Automation, Electrical and Mechanical Engineers deliver bespoke engineering solutions for blue-chip international clients across a diverse range of sectors, including Food, Pharmaceutical, Aerospace, Automotive, and Defence.

We design and manufacture special-purpose machinery and process control systems, working with many of the world's leading industrial brands on technically challenging and rewarding projects.

## The Role

We are seeking an experienced **Precision Machinist** to join our Toolroom team, playing a key role in the manufacture of high-precision components for a wide variety of engineering and automation projects. You will work primarily on bespoke and low-volume components rather than repetitive production runs, offering variety and technical challenges in every project.

This position is ideal for a skilled machinist who enjoys working autonomously and taking ownership of components and projects from initial drawing through to completion. Applications from candidates willing to relocate are welcomed.

## Key Responsibilities

- Manufacture precision components for machinery and automation projects
- Program, set, and operate CNC and manual milling machines and lathes as required
- Produce high-quality components to tight tolerances within commercial timeframes
- Read and interpret engineering drawings accurately
- Use a range of metrology equipment to self-inspect and approve components
- Work with minimal supervision while maintaining high quality standards
- Support other departments with design input and component modifications to meet customer requirements, sometimes at short notice
- Maintain a clean, safe, and organised work environment
- Demonstrate flexibility to work overtime when required by the business

*Experience with XYZ ProtoTRAK and Siemens CNC controllers is desirable, though full training can be provided.*

## **About You**

You will ideally be:

- A time-served or highly experienced machinist / turner
- Experienced in either milling or turning (experience in both is highly desirable)
- Passionate about precision engineering and delivering work to a high standard
- Comfortable working independently while also contributing positively to a team environment
- Willing to mentor junior team members when required
- Interested in working within a growing business serving international clients

*Experience with additional machine shop processes, such as surface grinding, would be advantageous but is not essential.*

## **Why Join Us?**

This role offers a high level of variety, responsibility, and autonomy within a progressive and supportive engineering environment.

The position is based in Plymouth – Britain's Ocean City, a vibrant waterfront location with excellent quality of life, close to the South Hams countryside and the coastlines of Devon and Cornwall.
